Altacef CV 500 Tablet

Manufactured By GLENMARK PHARMACEUTICALS LTD
Contains Cefuroxime (500 mg) + Clavulanic Acid (125 mg)

Description

Altacef CV 500 Tablet is an antibiotic consisting of cefuroxime and clavulanic acid. It is used to tre bacterial infections affecting the lungs, nose, throat, ears, skin and urinary tract. It works by interf with the formation of the bacterial cell wall and eventually kills them. Altacef CV 500 Tablet is not effective against infections caused by viruses.

Altacef CV 500 Tablet has some common side effects such as diarrhoea, stomach pain, headache, weakness, nausea, and vomiting. As this medicine may cause dizziness or drowsiness, avoid driving vehicles or operating machines. Do not take this medicine if you are previously allergic to it. Conta doctor if any side effects are seen for a longer period. Altacef CV 500 Tablet is not recommended in children below 12 years of age.

Altacef CV 500 Tablet can be taken with or without food. For the ease of remembering, take this t around the same time every day. Once an antibiotic is started, it is always recommended to finish entire course of treatment. Do not take antibiotics without consulting your doctor because unnec use of an antibiotic can reduce its effectiveness.

Altacef CV 500 Tablet may interact with live vaccines. Hence, maintain a time gap of at least 2 hou between administration. Inform your doctor if you have any liver, kidney, seizure or gastrointestin diseases before taking this medicine. If you are pregnant, planning pregnancy or are breastfeeding recommended to take this medicine only after consulting your doctor.
